

Date / Period	Mayor / Administration	Deputy Mayor	Councillors / Key Political Figures	Likely Internal Teams Involved	Relation to Flood Study / Peer Review
2014	Pam Parker	Deputy mayor arrangements changed during term	Russell Lutton, Luke Smith, Cherie Dalley, Trevina Schwarz	Floodplain management, planning, GIS, infrastructure teams	Original 2014 flood study became baseline comparison for later reviews.
2014–2015	Pam Parker administration	Various deputy roles during term	Existing Logan councillors	Strategic planning and drainage engineering teams	Existing flood mapping and planning overlays operating under ARR1987-era assumptions.
March 2016	Luke Smith elected mayor	Russell Lutton	Jon Raven elected during this council term	Executive leadership, planning and flood engineering	New council inherited floodplain planning framework and future ARR2019 transition requirements.
2016–2018	Luke Smith administration	Russell Lutton	Lisa Bradley, Jon Raven, Laurie Koranski, Darren Power	Flood engineering, strategic planning, GIS	Preparation period leading toward updated regional flood modelling and ARR2019 implementation.
March–April 2019	Luke Smith administration	Russell Lutton	Full elected council still operating	Water engineering and procurement teams	Logan-Albert Flood Study Update tendered and awarded to WRM.
April 2019	Luke Smith administration	Russell Lutton	Councillors still active	Floodplain management staff, procurement officers	WRM Water and Environment formally engaged for updated flood study.
May 2019	Logan Council dismissed by Queensland Government	Deputy mayor role effectively dissolved with council dismissal	Jon Raven, Lisa Bradley, Laurie Koranski	Governance, executive management, legal and technical flood staff	Governance disruption occurs during beginning of peer review process.
May 2019 – March 2020	Tamara O'Shane	No elected deputy mayor during administration	Jon Raven, Lisa Bradley, Laurie Koranski,	Flood engineers, strategic planning, GIS, legal/governance, infrastructure	Major peer review phases occurred during administration period.
13 June 2019	Administrator period	—	Advisory councillors consulted where required	Flood engineering and modelling teams	WRM Milestone 1 memorandum issued.
24 July 2019	Administrator period	—	Advisory councillors likely briefed	Floodplain management, GIS and drainage engineering	Peer Review 1 raised concerns around gauges, model boundaries and calibration assumptions.

September 2019	Administrator period	—	Advisory councillors and senior executives likely briefed	Hydrology and hydraulic modelling staff	WRM calibration report submitted.
1 October 2019	Administrator period	—	Advisory councillors potentially informed due to planning implications	Flood engineers, strategic planning, GIS	Peer Review 2 identified major concerns around rainfall allocation, DEM consistency, model behaviour and flood levels.
10 October 2019	Administrator period	—	Executive oversight likely	WRM technical staff with council flood officers	WRM formally responded to peer review criticisms.
29 October 2019	Administrator period	—	Advisory councillors likely aware due to escalation of concerns	Floodplain management, governance, planning	WT reiterated “significant uncertainty” remained around rainfall allocations and calibration methodology.
February–March 2020	End of administration period	—	Transition toward elected governance	Technical flood and planning teams	Peer Review 3 and WRM responses completed.
March 2020	Darren Power elected	Jon Raven	Newly elected council	Executive leadership, planning and flood engineering	New council inherited unresolved peer review process and draft flood study issues.
24 March 2020	Darren Power administration begins	Jon Raven	New elected councillors seated	Floodplain management, planning, governance	Draft flood study report issued.
30 April 2020	Darren Power administration	Jon Raven	Full elected council	Executive management, planning, legal, flood engineers	Peer Review 4 warned of substantial increases in flood levels and unresolved technical concerns.
5 May 2020	Darren Power administration	Jon Raven	Full elected council	Governance, flood engineering, strategic planning	WT stated project was “not complete” and unresolved matters had to be addressed before adoption.
Mid–Late 2020	Darren Power administration	Jon Raven	Full elected council	Planning scheme, GIS, flood overlay and infrastructure teams	Council moved into broader consideration of flood mapping adoption and planning implications.
